

# Delivering balanced nutrition to maximise quality and yields in cereals, brassicas and pasture

**Pasture Plus** is a scientifically formulated broad spectrum foliar fertiliser. Each application to the crop delivers essential elements in high leaf concentration for the improvement of Plant Health, Performance and Potential.

**P** Phosphorus

Stimulating root activity and energy turnover (by increasing sugar supply), increasing the interception of soil nutrient and moisture reserves directly improving yield and quality potential.

**Zn** Zinc

Improves disease resistance, heals wounds quickly and prevents cracked hooves, reduces skin lesions and improves growth and appetite, fertility and reproduction.

**Cu** Copper

Essential for utilisation of calcium for bone development, increases fertility, reduces disease and scouring, improves growth and pigmentation.

**Co** Cobalt

Essential for the micro-organism activity in the animals' rumen and an essential component of vitamin B12.

**Bo** Boron

Essential for healthy clover production, pasture palatability and to help plants utilise nitrogen. Good levels help suppress bloat.

**Mn** Manganese

Reduces skeletal abnormality, improves fertility and prevents abortion and still birth.

**Mo** Molybdenum

Essential for nodulation on legumes, and low levels will inhibit pasture production.

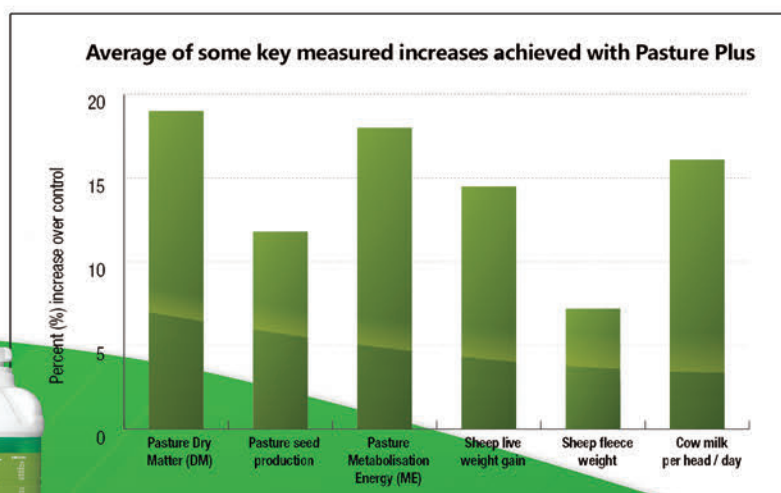

**Fe** Iron

Reduces anemia, improves growth and prevents anorexia.

Pasture Plus is available in the following convenient packaging sizes: 20 Litre, 110 Litre, 200 Litre, 1000 Litre

# PASTURE PLUS

ANALYSIS	G/L	%W/V
Nitrogen	57.0	5.70
Phosphorus	119.0	11.90
Potassium	35.0	3.50
Sulphur	36.5	3.65
Magnesium	15.0	1.50
Iron	2.2	0.22
Copper	6.1	0.61
Zinc	20.3	2.03
Manganese	28.0	2.80
Boron	7.0	0.70
Molybdenum	0.9	0.09
Cobalt	0.4	0.04

Note: One litre of this product weighs 1.42kg (i.e. SG=1.42)

## Your livestock will also have a preference for Pasture Plus

### APPLICATION GUIDE

Pasture type	Litres per ha. per tonne	Application per year	Best timing
Dairy	2 to 4	3	When more growth is required or when in nutrient deficiency.
Irrigated pasture	2 to 4	4	When more growth is required or when in nutrient deficiency.
Irrigated lucerne or hay production	2 to 4	4	When more growth is required or when in nutrient deficiency.
Dryland pastures	1 to 3	1 to 2	When more growth is required or when in nutrient deficiency.

### Convenient and Easy to Handle

Pasture Plus is tank mix compatible with most liquid herbicides, fungicides and insecticides (refer to RLF prior to mixing). For boom spray or mister dilution, the recommended water rates are 25:1 to 50:1. For aerial application, the water rate should not be less than 20L/ha. and should be applied in morning dew conditions.

The improved potential from Pasture Plus can be measured in any one or a combination of any of these reported benefits, translating to cost-effective returns;

- Increased early root and plant-top vigour
- Increased initial growth and post-grazing regrowth
- Improved nutritional feed value
- Improved animal health
- Reduced animal mortality
- Improved weight gains
- Increased wool and milk yields
- Reduced supplementary feed costs
- Reduced feed supplements & vet costs
- Improved carry over benefits to the following crop
